Leadership Experience

Manager, Activator Operations / Jun 2025 - Present

Nucleate HQ

- Designed an applicant sourcing playbook and delivered training sessions for 17 regional team leaders, helping to streamline operations across the organization.
- Built an Airtable dashboard to review the success of applicant sourcing channels, enabling data-driven sourcing efforts.
- Partnered with marketing to create outreach materials that improved applicant engagement and experience.

Director, Strategy and Experts / Oct 2024 - Present

Nucleate, Switzerland

- Interviewed 8 biotech startup founders using structured evaluation criteria to assess their suitability for Nucleate's Activator cohort.
- Sourced 10+ technical, market, and regulatory experts to advise startups during Activator program workshops.

Consulting Project Manager / May 2024 - Jul 2025

The Consulting Society EPFL, Switzerland

- Led a client project for a bacterial diagnostics startup, delivering market and pricing strategy recommendations based on competitive analysis and stakeholder interviews - directly integrated into the company's pitches.
- Mentored junior consultants and provided guidance on research synthesis and presentation skills.

BCG Academy training / Dec 2024

Zürich, Switzerland

- Completed a one-day immersive case workshop on product strategy and customer experience based on a MedTech case. Invited among ~20 candidates from Swiss student consulting societies and organizations.

iGEM Delegate - United Nations Convention on Biological Diversity / Nov 2018

Sharm El-Sheikh, Egypt

- Delegate representing iGEM, an international synthetic biology organization spanning over 65 countries and a network of 86k scientists, advocated for youth inclusion in global biotech policy; co-published a reflection [here](#).

Research Experience

Graduate Researcher – Gut Microbiome & Bioinformatics / Aug 2020 - Present

University of Lausanne, Switzerland

- Designed and executed gut microbiome studies using metagenomics, resulting in 4+ peer-reviewed publications
- Built custom analysis pipelines (Python, R, Bash) and managed collaborations across India, Kenya, and Malaysia
- Reduced pandemic-related project delays by 12 months via strategic collaboration development.
- Co-developed Master's bioinformatics curriculum; student projects contributed to a peer-reviewed publication
- Presented at 4+ international conferences; recognized for clear, engaging presentations

Master's Thesis Researcher / May 2019 - May 2020

Indian Institute of Science, Bangalore

- Identified and set up a low-cost, Nanopore-based DNA sequencing pipeline at 10% of the traditional setup cost.
- Contacted and looped in clinical partners to lead a study identifying gut microbiome shifts in chronic pancreatitis.
